

SCHOOL MANAGEMENT PLATFORM

The School OS Parents Actually Open.

AeroOS connects parent communication, teacher workflows and admin operations in one clear system — built for Indian schools from LKG through Class 12.

1 Month Free Trial Full-featured. Zero commitment.	Starts from ₹5 Per Student School-friendly pricing, always.
iOS + Android Native Apps For parents and teachers alike.	19 Modules Start core. Scale when ready.

What is AeroOS?

A school ERP built for real schools — parent app, teacher workflows and admin dashboard, all connected. Start with attendance, homework, fees, exams and circulars. Layer in AI, Quiz Arena and kindergarten tools when you're ready.

Built for Every Role

- **Parents** — timely updates, zero office calls
- **Teachers** — full classroom control from mobile
- **Admins** — one dashboard, complete visibility
- **Modules** — optional, enable only what you need

One Platform.

Four Clear Areas of Value.

AeroOS is built around four focused layers — each role gets exactly the view it needs, nothing more. Start with the core. Scale when ready.

Parent Mobile App

- Attendance alerts and homework updates
- Fee reminders and report cards
- Circulars, OTP login, multi-child switching

Teacher Workflows

- Mark attendance and assign homework from mobile
- Message class groups and share feedback
- AI-assisted question paper creation

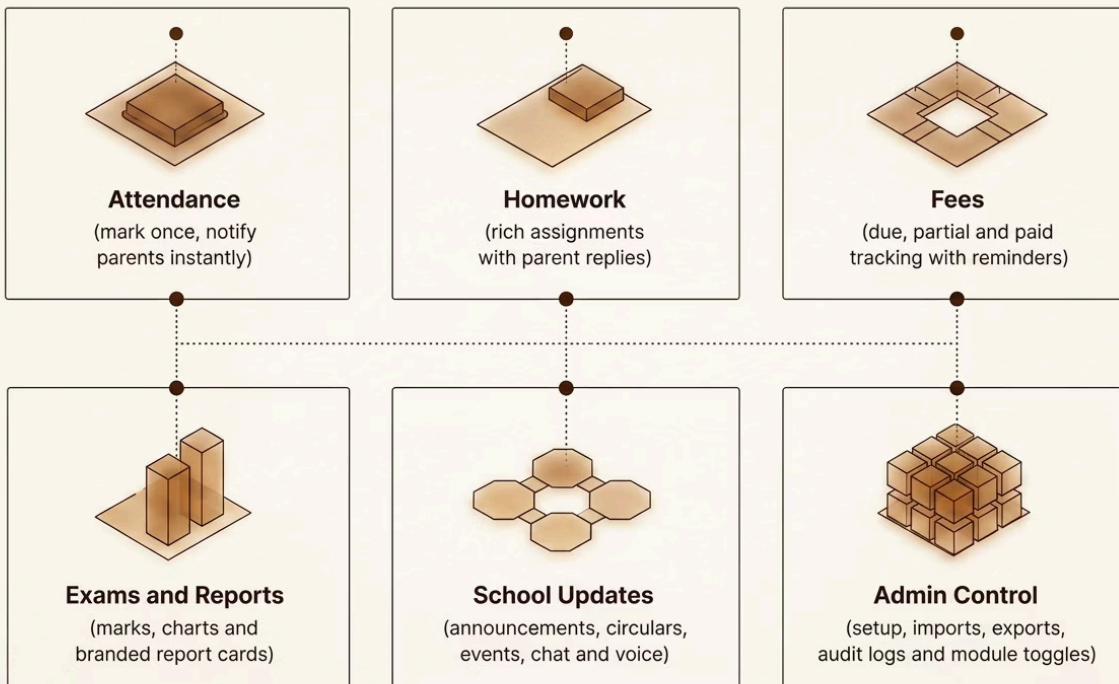

Admin Control Room

- Students, staff and fees — one dashboard
- Exam setup, PDF reports and audit logs
- Module toggles, bulk imports and backups

Growth Modules

- Ask AI — grounded in your school's data
- Quiz Arena for daily student practice
- Kindergarten mode, voice calls and more

It Turns Daily School Friction Into Clear Digital Workflows.

AeroOS is not a feature list. It is a measurable reduction in daily pressure — for the office, for teachers and for parents. Every workflow maps directly to a real problem Indian schools face every single day.

Too Many Parent Phone Calls

Parents check attendance, homework, fees and report cards directly from the app — before they think to call the office.

Teachers Repeat the Same Updates

Homework, circulars, feedback and marks reach the right class once. No repetition, no missed sections, no follow-up.

Fee Follow-Up Is Scattered

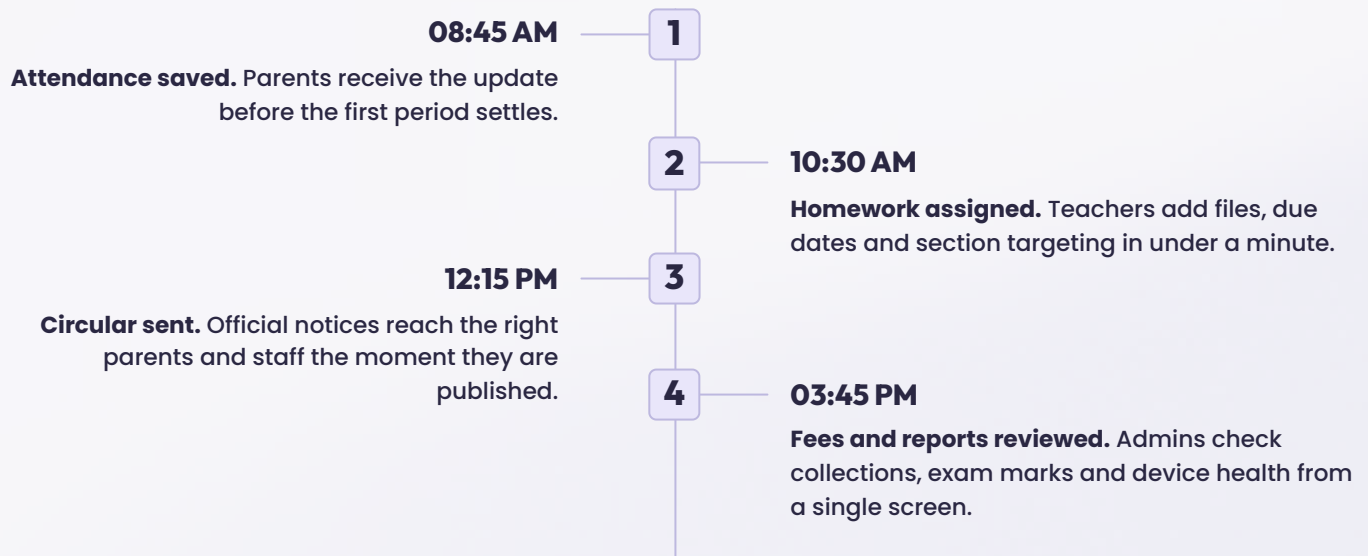

Admins track due, partial and paid status with automated reminder cycles. No spreadsheets, no manual chasing.

Reports Take Too Much Manual Work

Marks, charts and branded report cards stay connected inside AeroOS. Publish with one action. No extra tools required.

A School Day in AeroOS

The interface moves around real school moments — the app feels alive because the school day is alive.

Why It Is Different

Mobile-First. Always.

The primary channel for parents and teachers is mobile. A dedicated early-years home screen serves LKG through Class 3.

Full Audit Trail. No Exceptions.

Every change is logged, timestamped and attributable. Feature flags per school, 12-hour backup cadence and live device health monitoring.

AI Built In. Grounded in Your Data.

Ask AI answers questions using real school data — not generic responses. AI-assisted question paper creation saves teachers hours every exam cycle.

Built for India. From Day One.

Designed specifically for Indian schools from early years through Class 12. English and Tamil parent UI supported out of the box.

GET STARTED

Start Your One-Month Free Trial.

Premium ERP for Indian schools. School-friendly pricing, no lock-in, no credit card required — just a full month to see what AeroOS can do.

Starts From ₹5

Per Student / Month

1 Month

Free Trial

Full-featured, zero cost to start. No credit card required.

12

Grades Covered

LKG through Class 12. Built for full Indian school journeys.

What Indian Schools Usually Ask

Does AeroOS work for Indian schools?

Yes. Built specifically for LKG through Class 12 — with mobile apps, full ERP workflows and English and Tamil parent UI built in.

Which workflows are included?

Attendance, homework, fees, exams, report cards, circulars, events, chat, AI, Quiz Arena, kindergarten mode and full audit logs — all in one system.

How do we start?

Sign up for a free month. Begin with core modules — attendance, homework, fees and exams. Add AI, Quiz Arena or kindergarten mode whenever the school is ready.

What does it cost after the trial?

From ₹5 per student per month for core modules. Optional modules are enabled and priced separately — no bundled costs for features you don't use.

Simple enough for daily use. Complete enough for full school control. Management gets a serious dashboard — parents and teachers get a mobile app they actually open.
